

Clean and Green Campus Initiative

Date: 23.03.2023

Initiatives taken to keep clean and green campus:

1. **Natural compost pits:** Multiple compost pits have been made to collect all the tree leaves, green waste or residual. It is then used for creating manure, all the waste is collected and buried in the pit and is let to decompose to form natural soil fertilizer. Also the green vegetable waste from mess is used to decompose in the pit which is used for kitchen garden in the campus.

2. **Tree plantation:** Tree plantation is carried out throughout the year on the occasion of world environment day, monsoon arrival, and First year orientation etc.

3. **Green House (nursery):** Small scale nursery in and around the campus, used for growing plants and flowers for recreational and medicinal uses.

4. **Waste Segregation:** All the waste collected throughout campus is segregated and the Natural/Organic waste is used for compost creation.

5. **Rainwater harvesting point:** Total five sites on campus are present that are used as rain water recharging sources to increase the water level ground water.

6. **Ultimate care is taken to develop and maintain green landscaping by trained gardeners and supervisors.**

7. **More eco-friendly campus:** Encourage students and staff to use electronic devices instead of paper wherever possible to reduce paper waste and promote more eco-friendly campus.

8. **Limit food waste:** Encourage student and staff to reduce food waste by composting food scraps, donating excess food to local charities or using food waste as animal feed.

9. **Offer environmental knowledge:** Provide students with opportunities to learn about environmental issues and get involved in environmental organizations on campus to raise awareness.
