PROGRAM SPECIFIC OUTCOMES (PSO) – Department of Artificial Intelligence Engineering

These are what the students should be able to do at the time of graduation. The PSOs are program specific. PSOs are written by the department offering the program.

PSO1	Graduates will demonstrate advanced proficiency in artificial intelligence concepts, algorithms, and technologies, enabling them to develop innovative AI solutions for real-world problems.
PSO2	Graduates will apply higher-order thinking skills to analyze, design, and implement AI solutions, demonstrating the ability to solve complex problems in diverse domains.
PSO3	Graduates will exhibit a strong aptitude for research and entrepreneurship in AI, showcasing the ability to explore new frontiers in AI and contribute to technological advancements and business innovations.

Program Educational Objectives (PEOs) - Department of Artificial Intelligence Engineering

Program Educational Objectives Essentially Answer the Question: Why does the Program exist in the first place? It has to be answered by the management in Consultation with all the Stakeholders!

PEOs	Program Educational Objectives Statements
PEO1	Graduates of the Artificial Intelligence program will demonstrate strong foundational knowledge and advanced skills in artificial intelligence, enabling them to excel in professional careers or pursue higher education in the field.
PEO2	Graduates will possess the ability to think creatively, identify opportunities, and apply AI technologies to solve complex problems, fostering innovation and entrepreneurship in the global arena.
PEO3	Graduates will exhibit leadership qualities with a strong sense of ethics, contributing positively to society through the application of AI technologies while upholding ethical values and social responsibility.
