

PROGRAM SPECIFIC OUTCOMES (PSO) – Department of Electronics & Communication Engineering

These are what the students should be able to do at the time of graduation. The PSOs are program specific. PSOs are written by the department offering the program.

PSO1	Identify and apply theoretical concepts for analysing and designing Electronics & Communication Engineering systems to solve real world problems.
PSO2	Demonstrate the ability to acquire standard practices and skills in the area of next generation communication systems to arrive at solutions for academia/ Industry.
PSO3	Ability to acquire and apply recent “Electronics & Communication” Engineering tools through projects, seminars and industrial experts interactions on futuristic cutting-edge technologies.

Program Educational Objectives (PEOs) - Department of Electronics & Communication Engineering

Program Educational Objectives Essentially Answer the Question: Why does the Program exist in the first place? It has to be answered by the management in Consultation with all the Stakeholders!

PEOs	Program Educational Objectives Statements
PEO1	To prepare industry ready graduates who can recognize, synthesize and apply the acquired knowledge in basic sciences and mathematics in solving Electronics Engineering.
PEO2	To prepare graduate with good communication skills, soft skills, ethical values, managerial skills, leadership qualities and professional conduct in the career.
PEO3	Able to analyze the latest issues and technological growth in the field of Electronics and Communication Engineering and update their knowledge and skills accordingly through continuous learning.
PEO4	To provide solid foundation in Electronics and Communication engineering so that they can pursue higher studies in their subject.
